DOWNLOAD NEW ANABIOS HUMAN DRG RESEARCH POSTER PRESENTED AT 2018 IASP WORLD CONGRESS ON PAIN

Download our latest pain research poster, "Identification of a Selective Voltage Gated Sodium Channel Blocker Able to Preferentially Inhibit Human Dorsal Root Ganglia Neurons Sensitized by Inflammatory Agents." The poster was presented at the IASP World Congress on Pain in Boston last month, and provides a case study for preclinical drug discovery using human primary cells.

NEW CARDIOMYOCYTE RESEARCH PRESENTED AT INTERNATIONAL SPS MEETING IN WASHINGTON, D.C.

Download our new cardiomyocyte research poster presented at the recent Safety Pharmacology Society Annual Meeting in Washington, D.C. AnaBios tested adult human primary ventricular myocytes for enabling inotropic risk prediction of drugs. Our validation study found inotropic responses to 26 drugs, with differentiation of drugs operating via distinct mechanisms of action.

ANABIOS INSIGHT: WILLIAM NGUYEN, RESEARCH SCIENTIST

How many years have you worked at AnaBios?

2 years

Describe your past experience before working at AnaBios.

I worked in academia doing research on inflammation and aging at the University of California San Diego School of Medicine. Afterwards, I worked on neuroinflammation and neurodegenerative diseases such as Parkinson's at The Scripps Research Institute.

Why do you like working at AnaBios?

It's a small company so you have more access to top executives who listen to your input.

What are your professional interests?

I enjoy working out, playing ultimate frisbee and tennis.
